The Pituitary Gland & Essential Oils

The pituitary is often called the master gland and controls most of our hormone functions such as our temperature, thyroid function, growth, urine production, testosterone (men), ovulation & estrogen (women).

How essential oils can reach the pituitary gland

1. Smelling - the molecules from the oils will go directly to the pituitary gland
2. Roof of the mouth - put oil on thumb & press against the roof of the mouth will be absorbed into the blood
3. Under the tongue - the oil will be absorbed into the blood
4. Middle of the eyebrows - the oil will raise the frequency of the pituitary
4. Crown & back of head - the oil will raise the frequency of the pituitary

Oils to help the pituitary gland

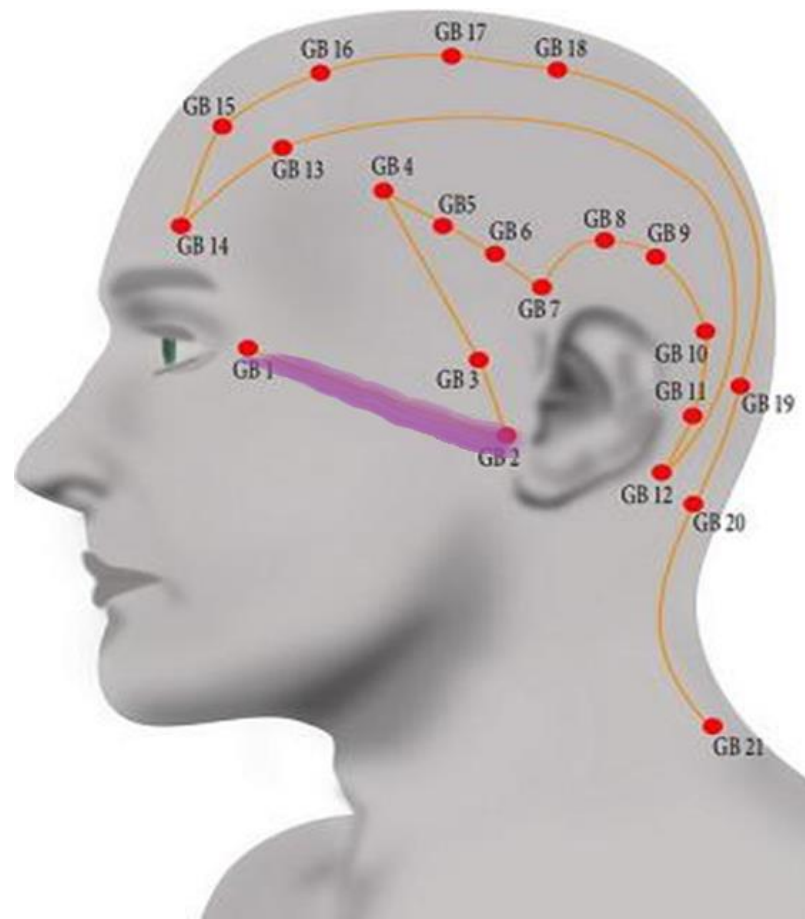

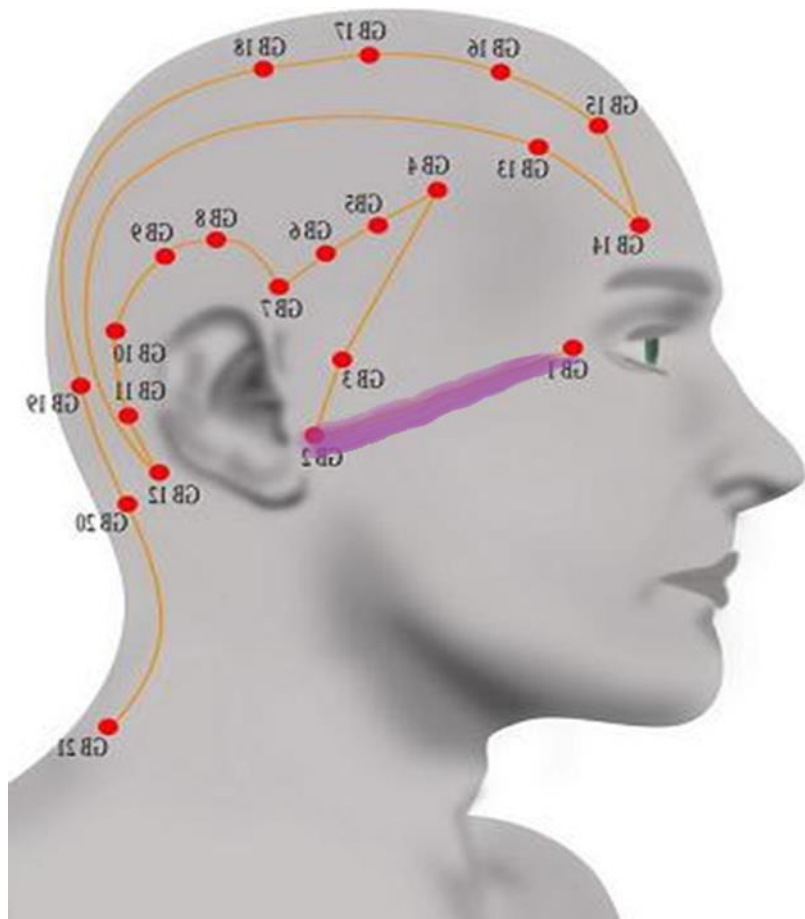

Art, DolfCheng

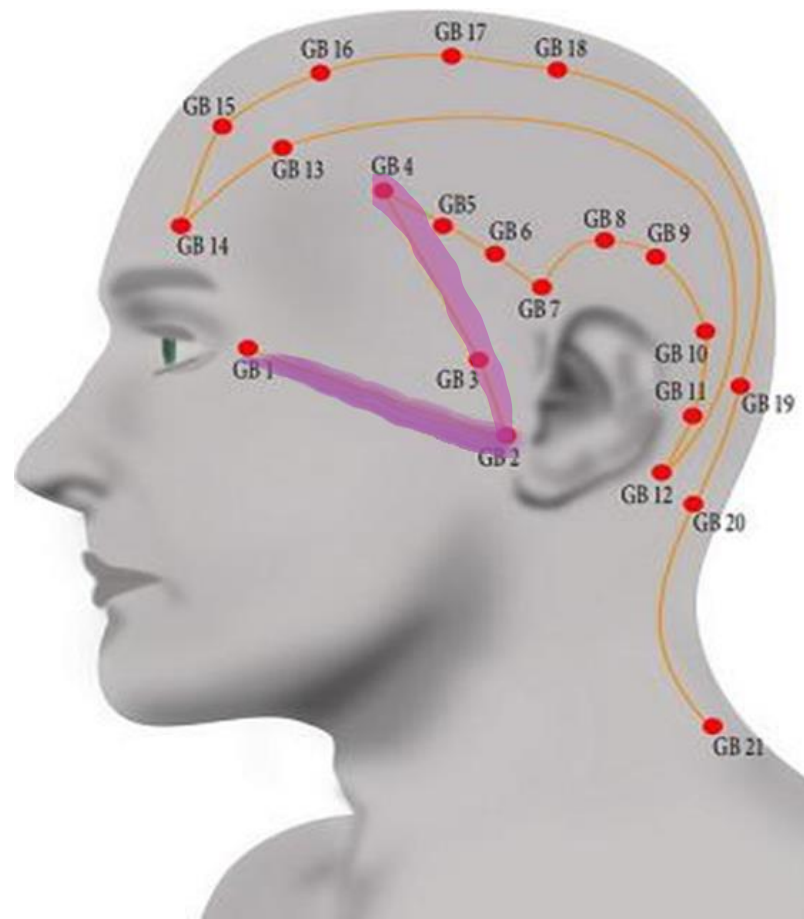

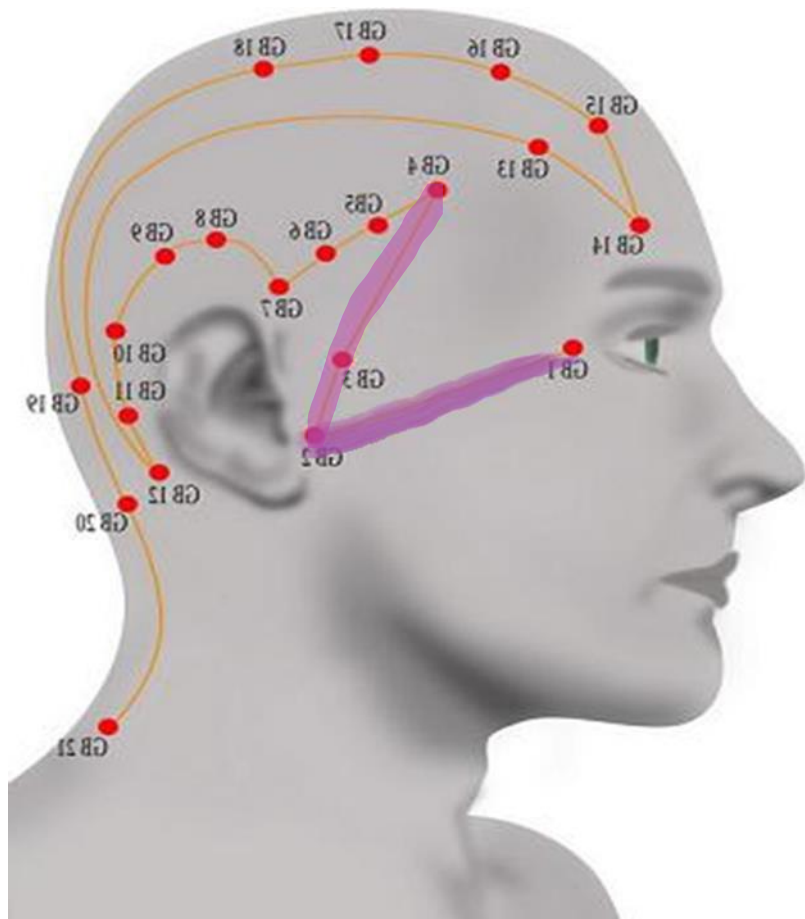

Touch your Temples

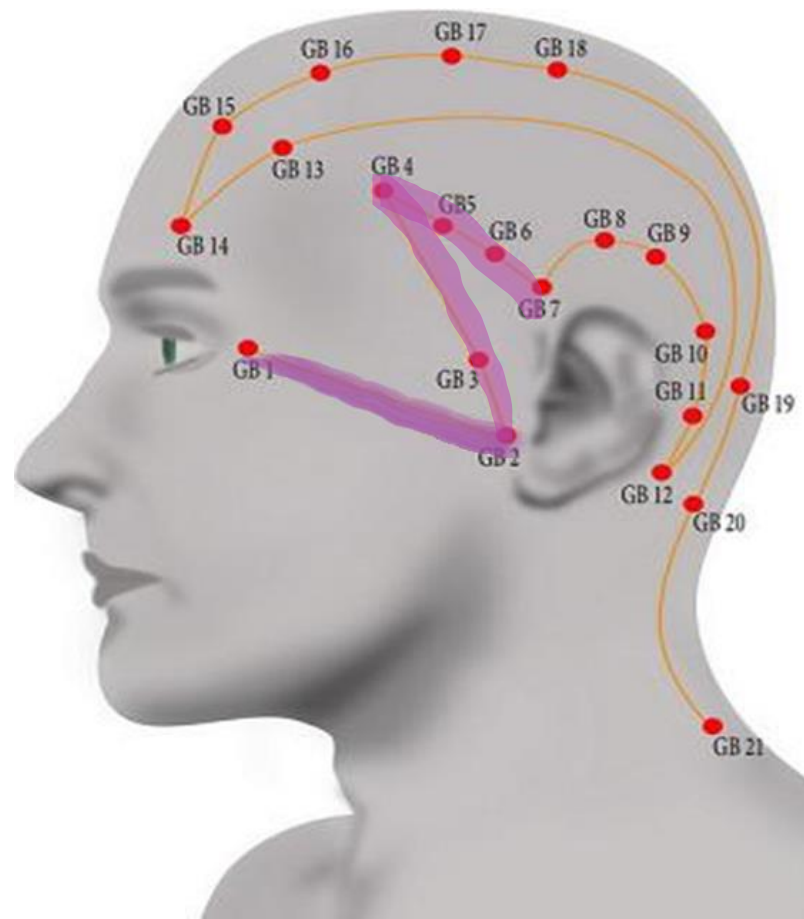

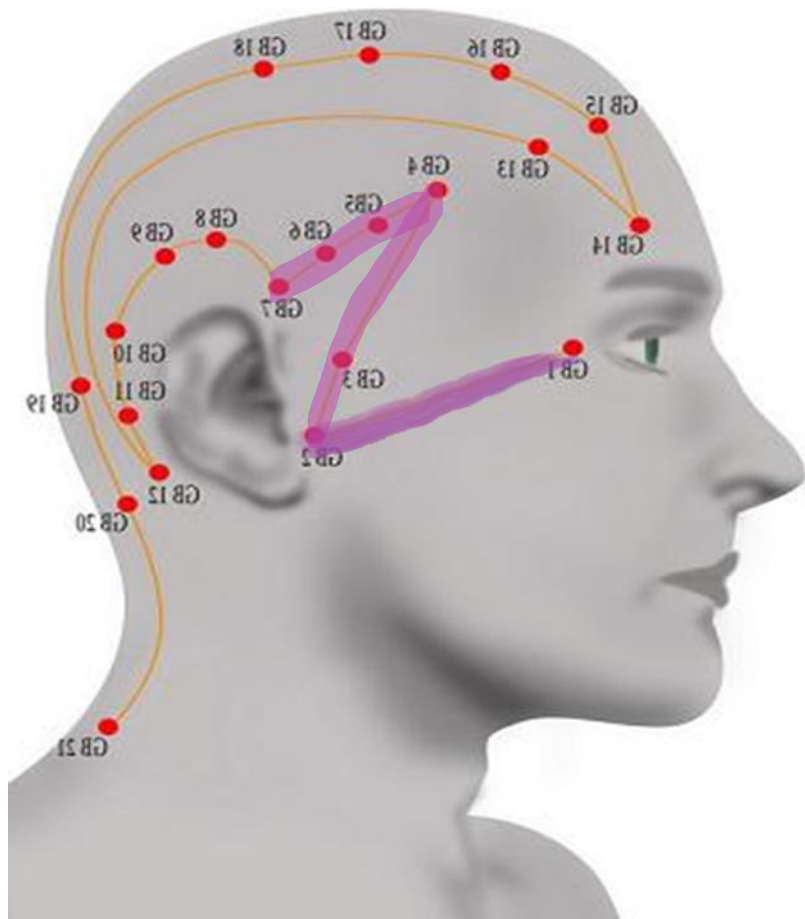

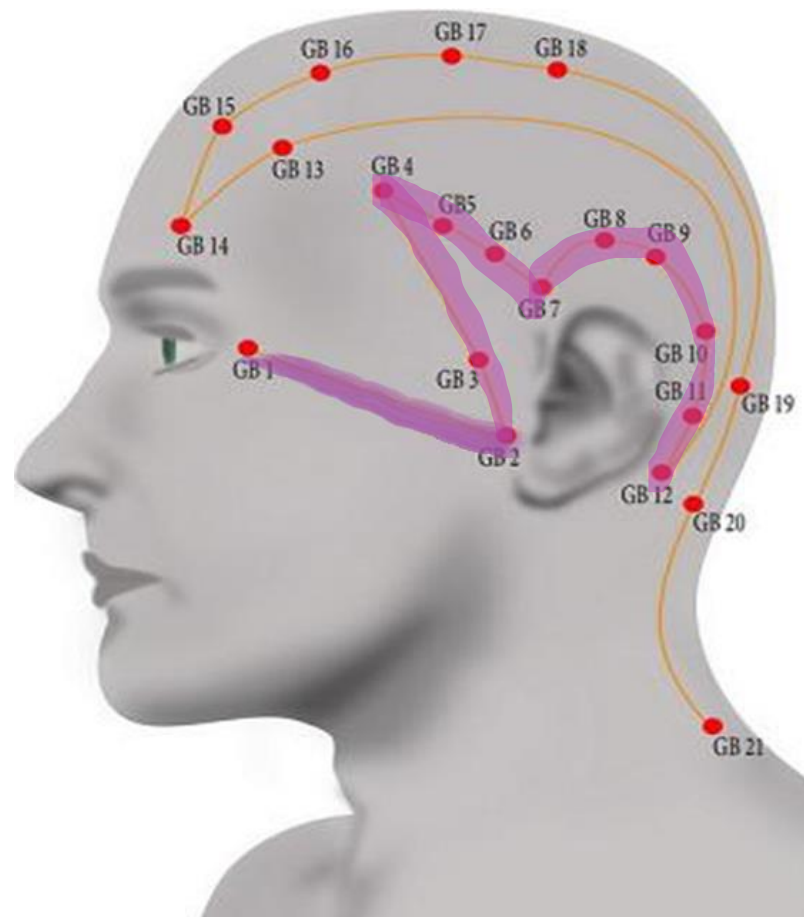

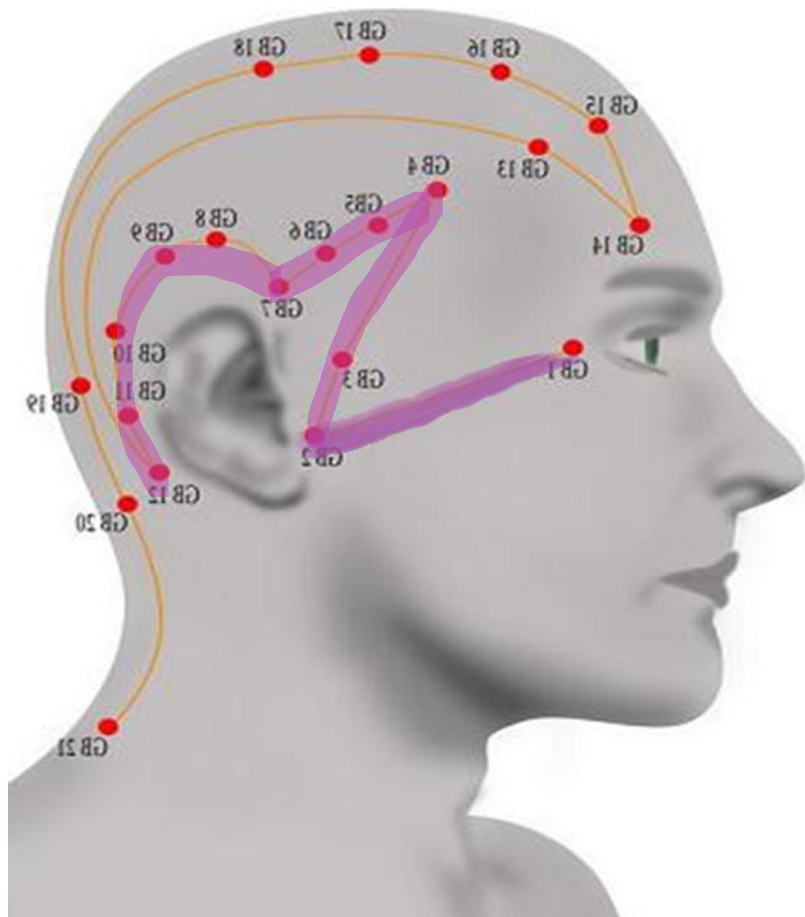

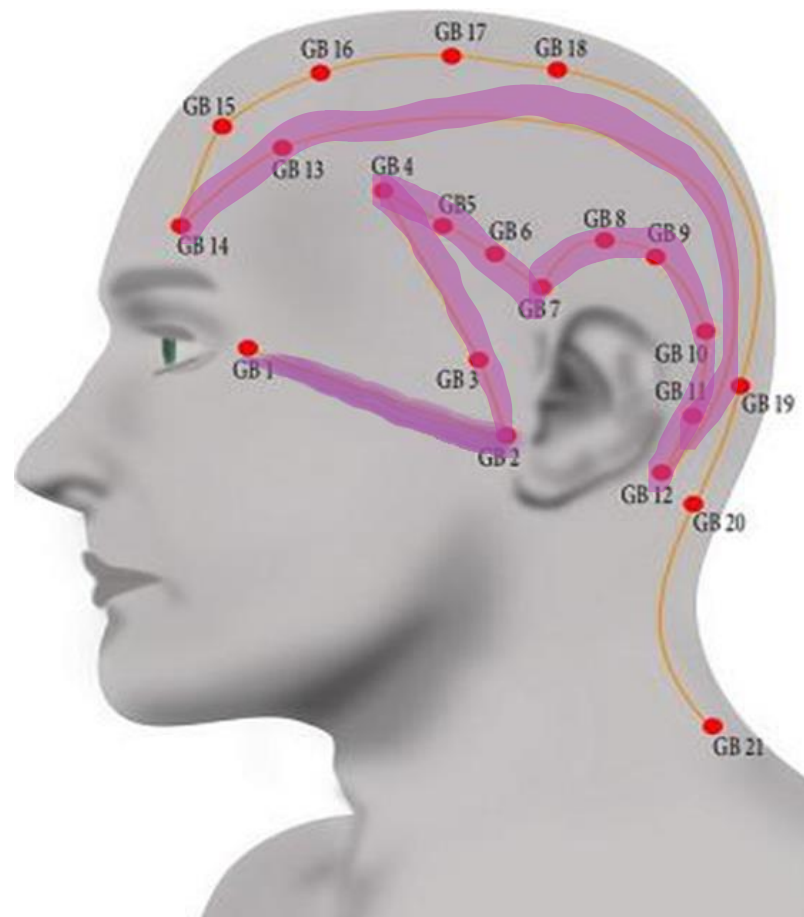

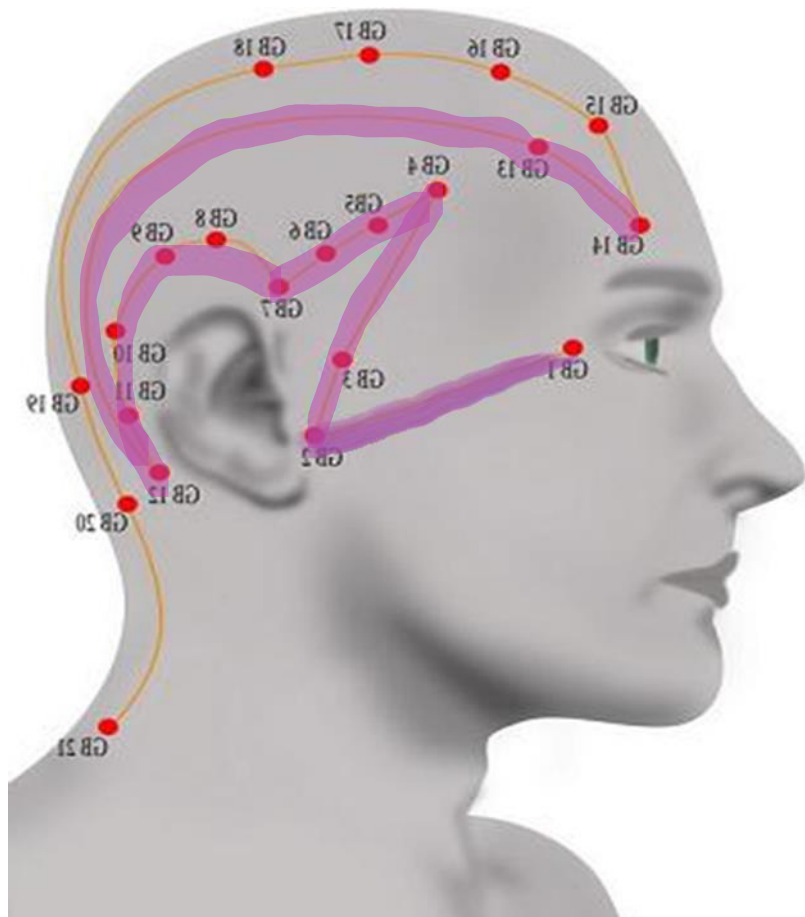

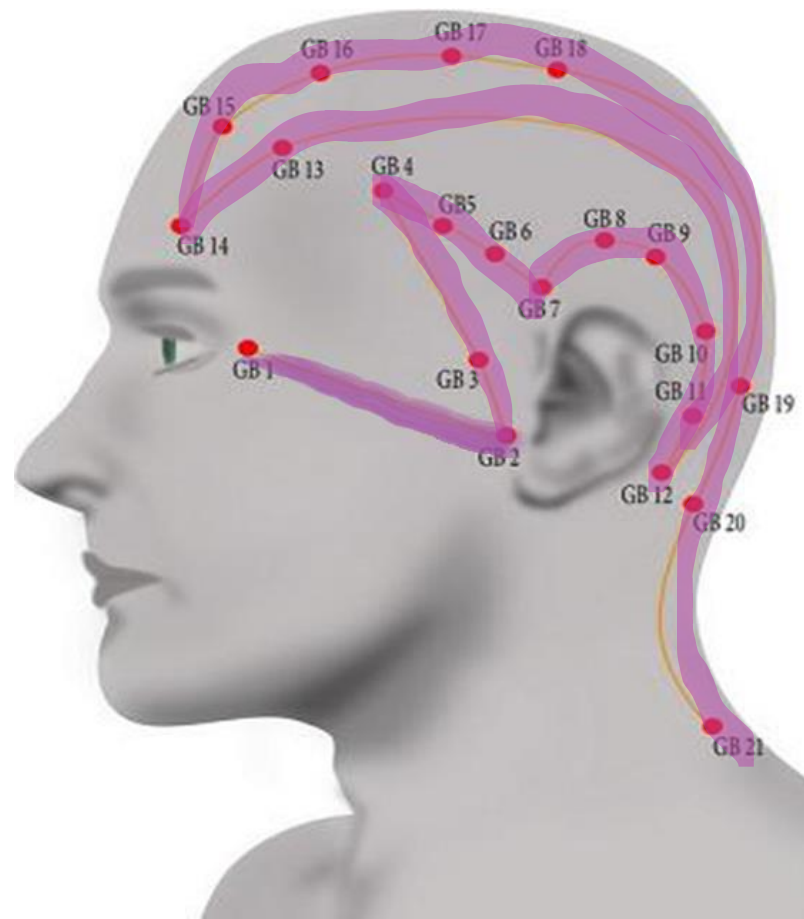

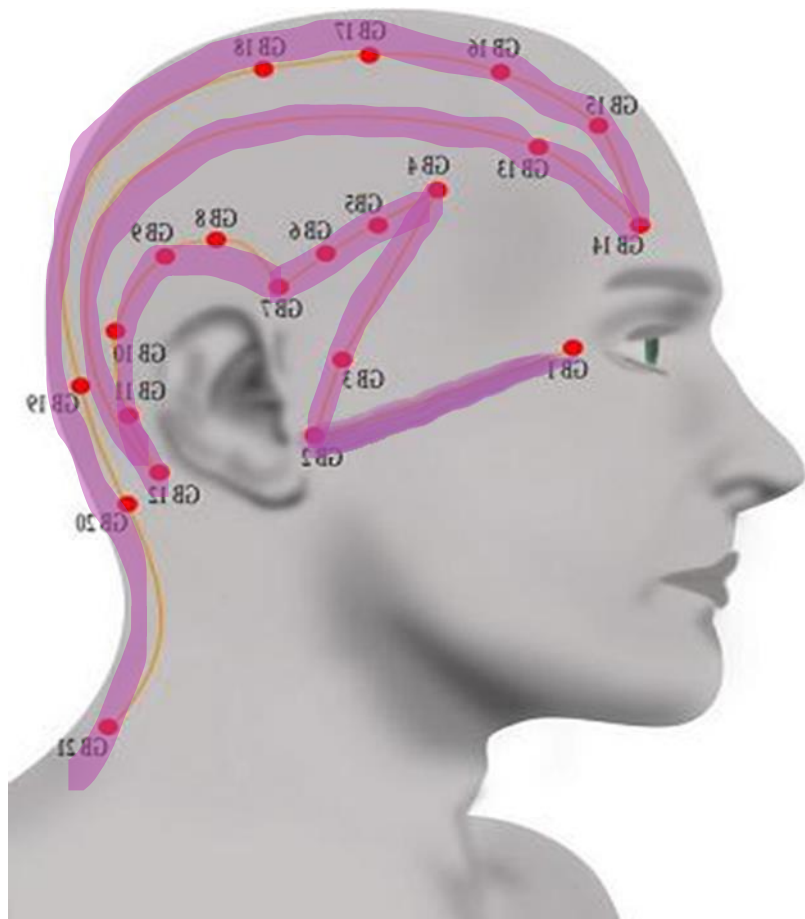

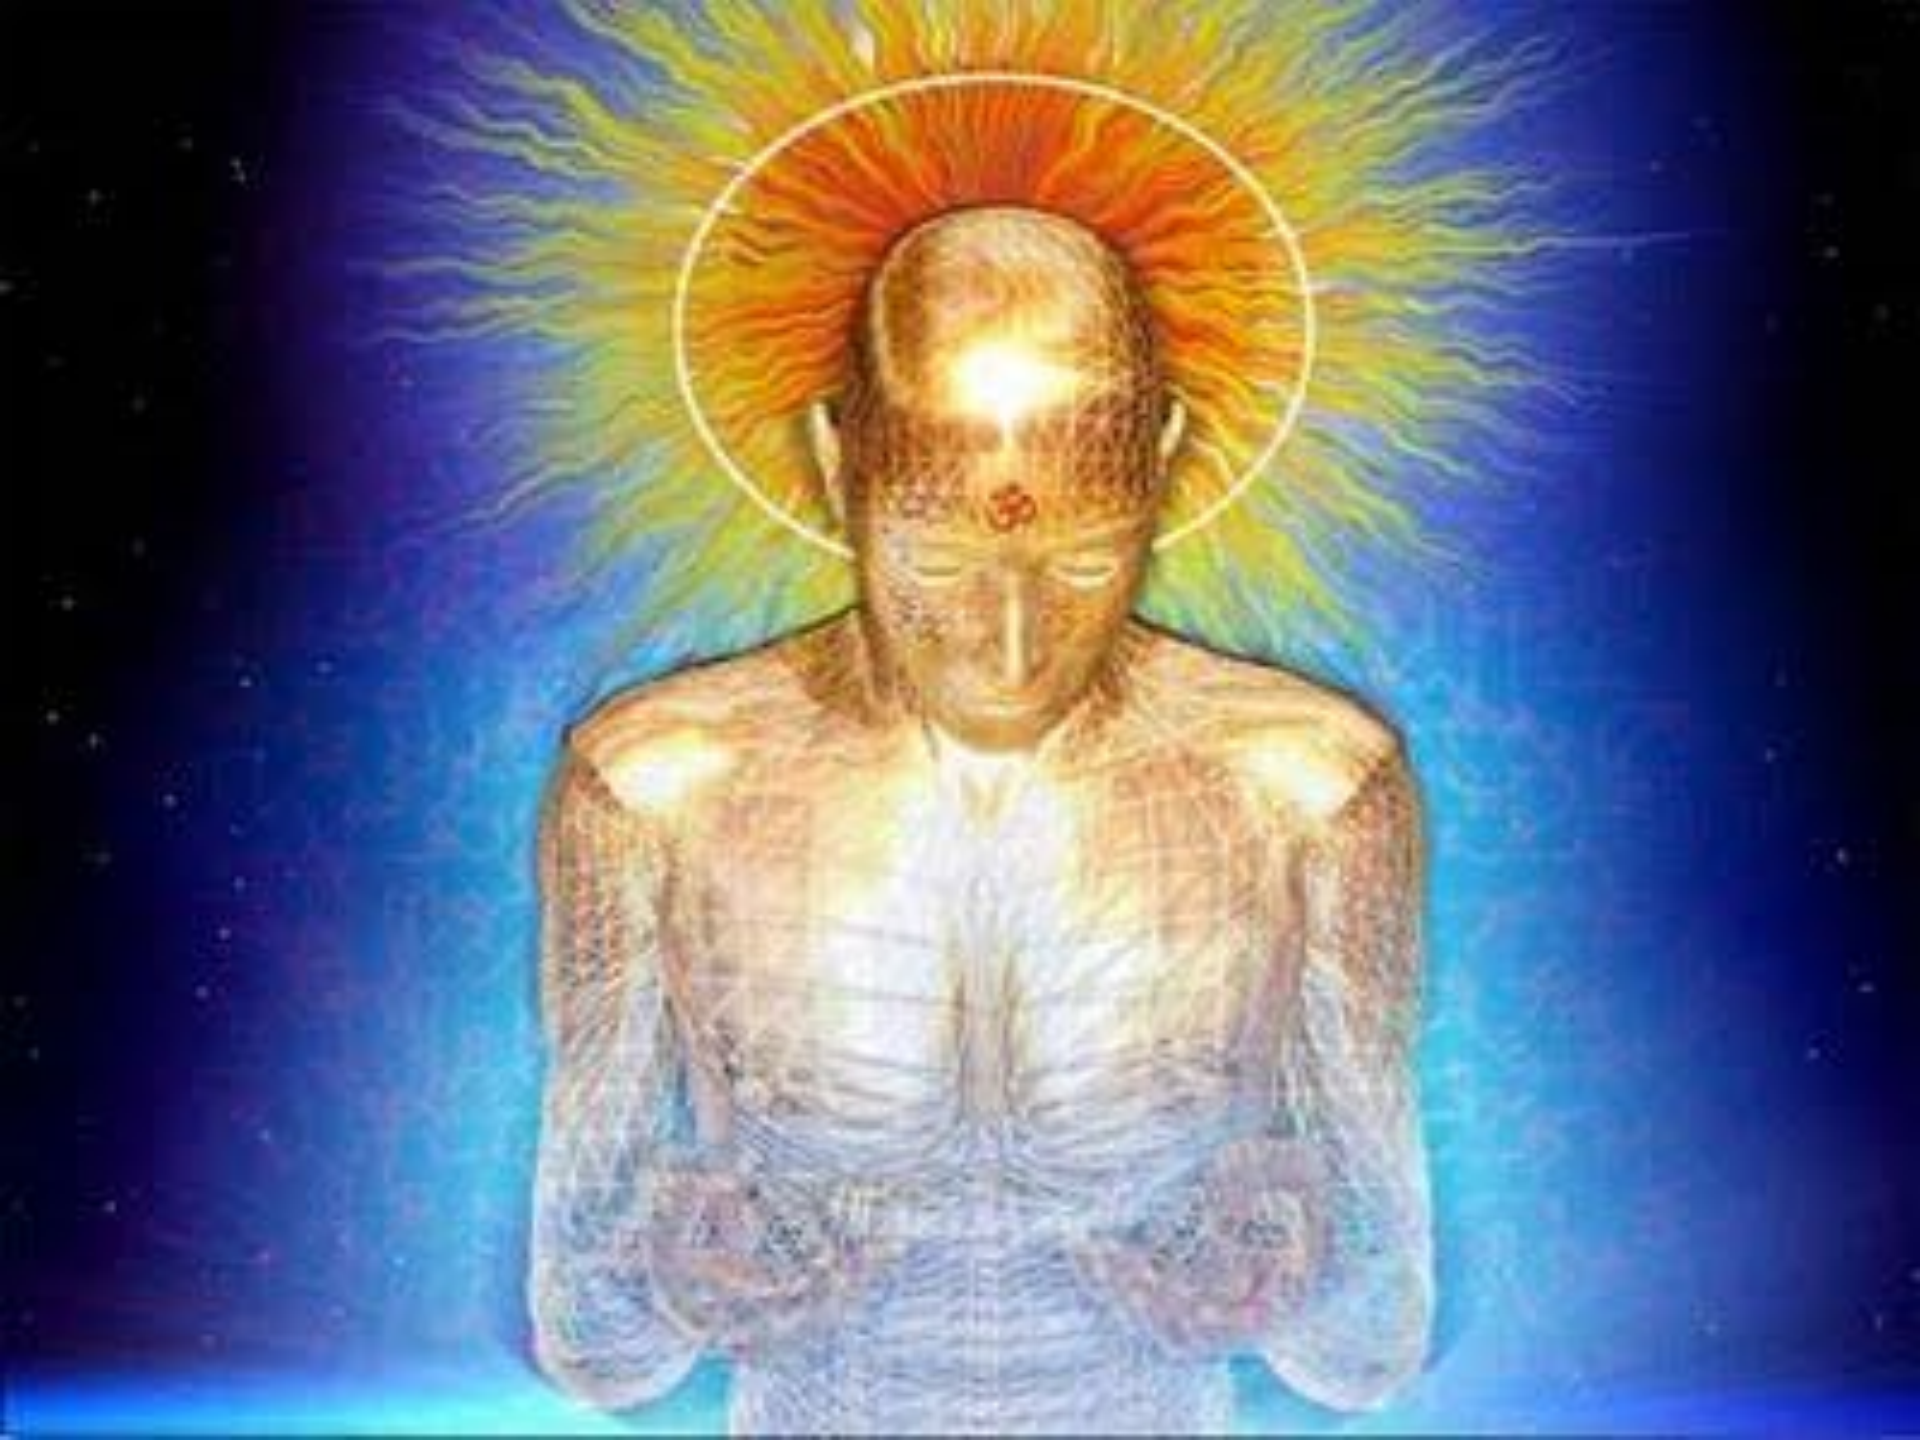

I honor that place in you
Where when you are in that place in you
and I am in that place in me
WE ARE ONE!

We are made of the same Star stuff, we breathe the same
Air, walk on the same Earth and drink the same Water.
