TWO THEORIES

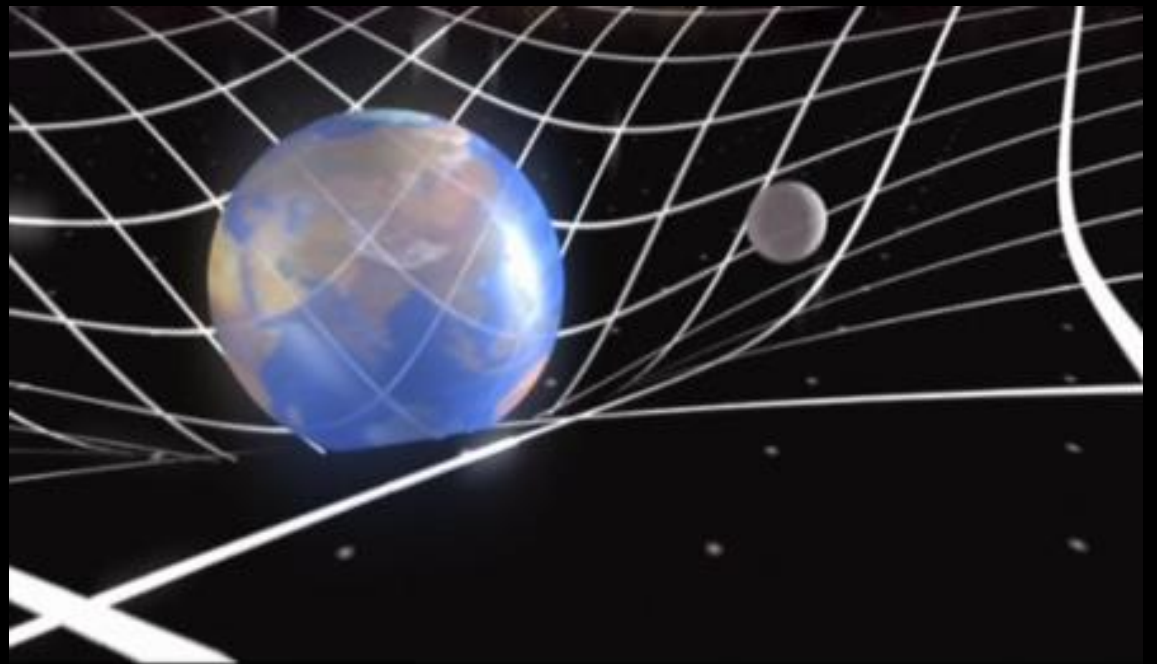

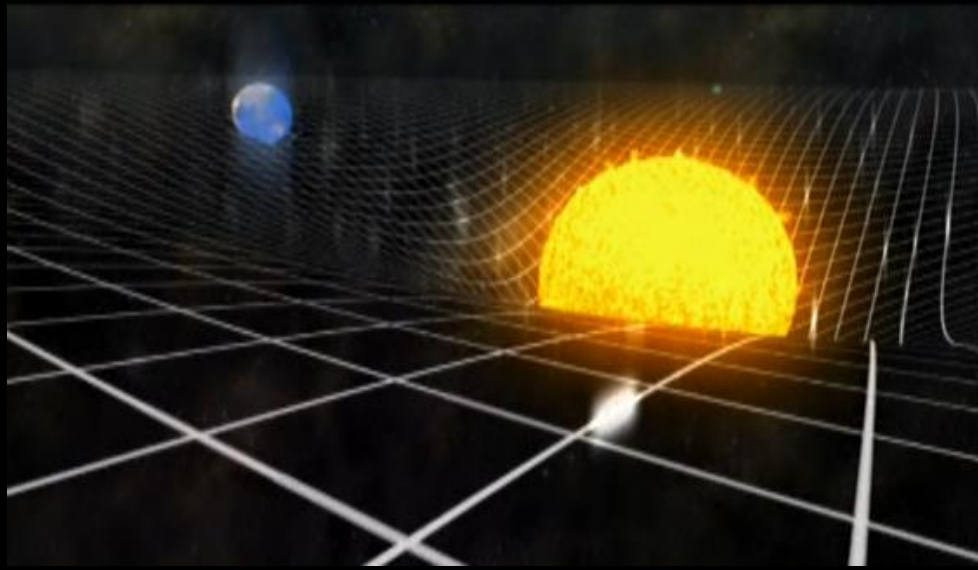

# GENERAL RELATIVITY

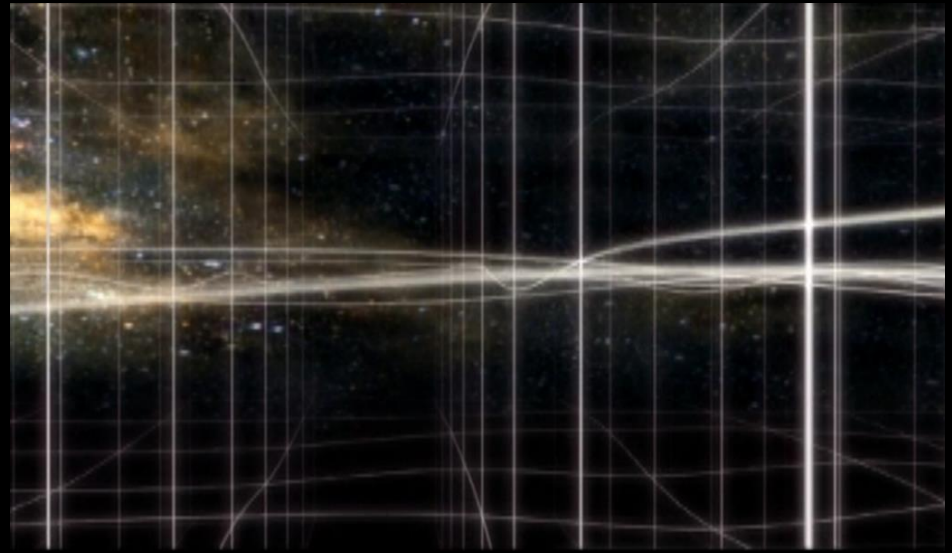

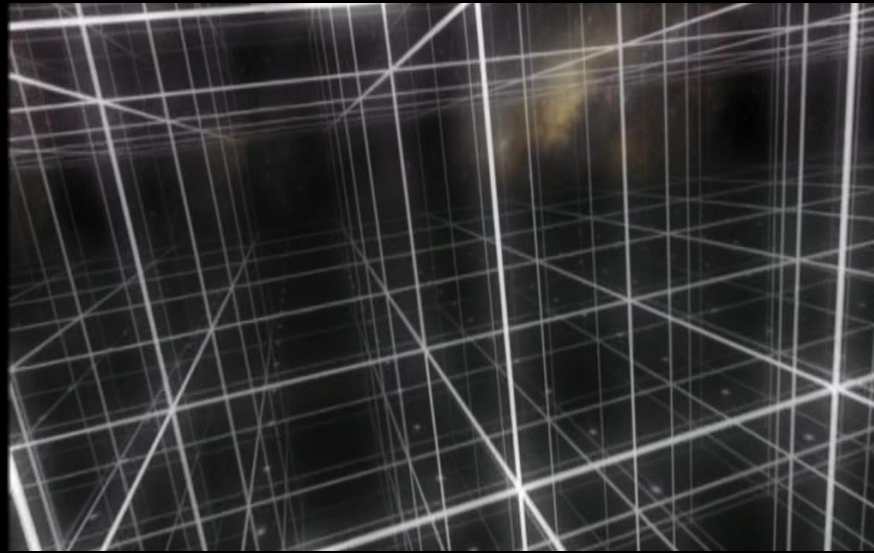

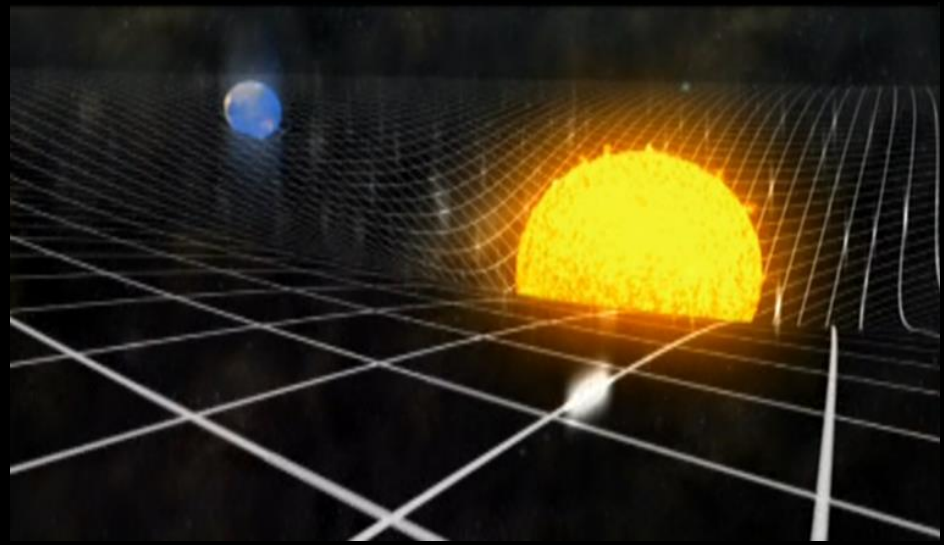

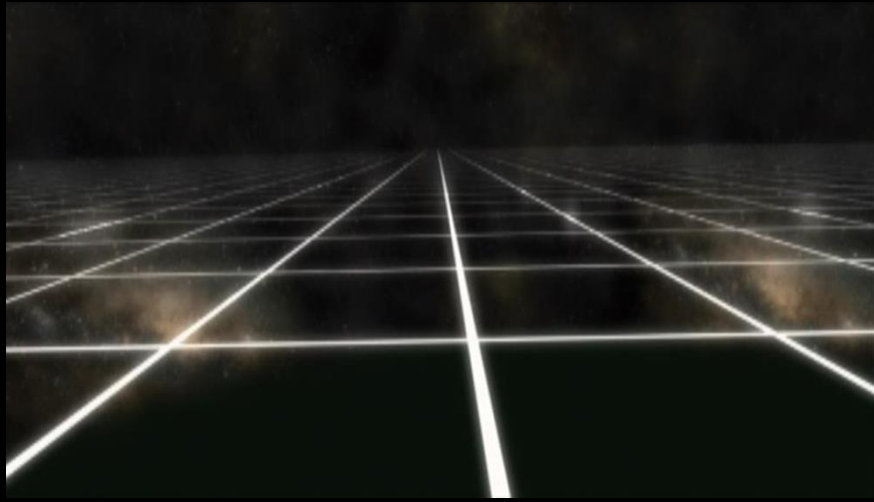

It explains the BIG...what we can see with our eyes.

You can use it to predict things.

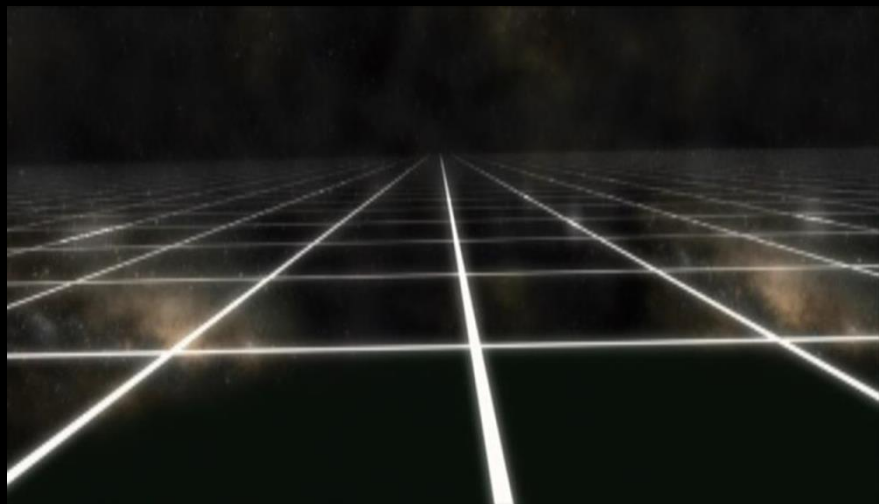

Gravity = Space-Time being warped

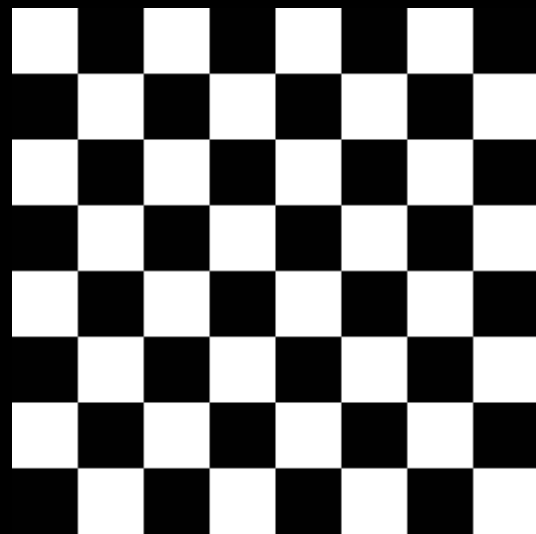

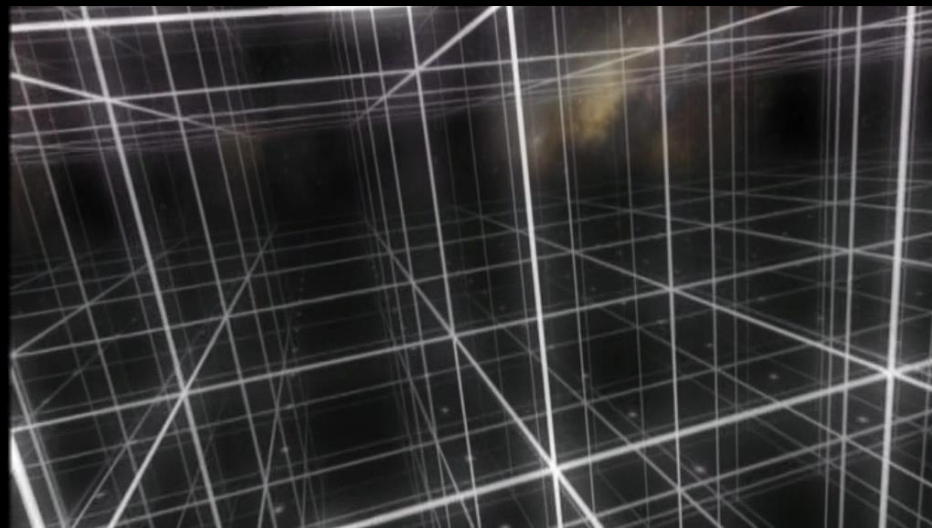

Space-Time has depth though!

# QUANTUM MECHANICS

It explains the small. Nothings is predictable....things are only PROBABLE. As in it “probably will happen.”

Quantum Mechanics

General Relativity

The problem is that these two mathematics are not interchangeable. You can't use General Relativity in the Quantum world and vice versa. This means we are missing something! Some piece of the puzzle.

STRING THEORY looks pretty promising in that it's mathematics works in both the small (microcosm) and large (macrocosm).

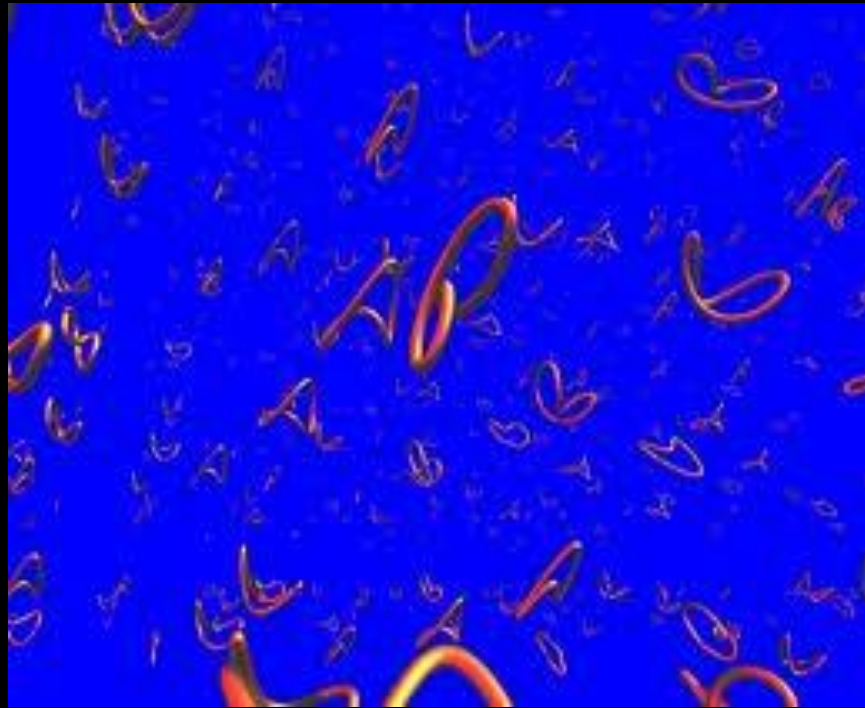

# STRING THEORY

In physics, string theory is a theoretical framework in which the point-like particles of particle physics are replaced by one-dimensional objects called strings.

# STRING THEORY

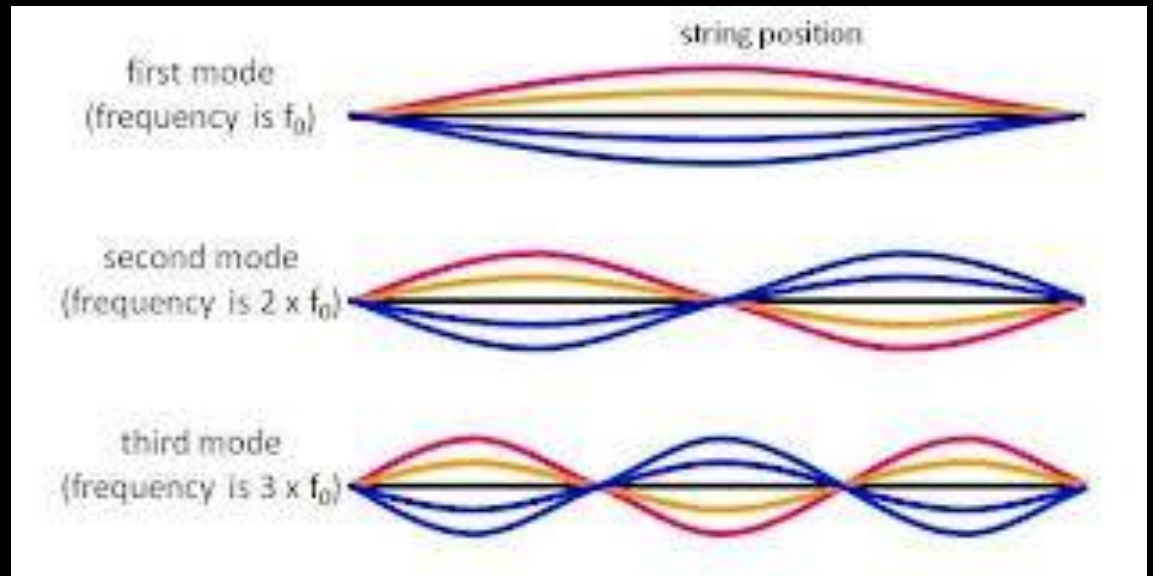

The problem with String Theory is that there are no experiments or observations (science) that can be done to prove or disprove it, because of this some say it can only be viewed as a philosophy instead of real science.

Who is pulling your **STRINGS**?

I am not saying this theory is accurate. However, I do like the idea of String Theory as there is a component of vibration and frequency. Like strings on an instrument.

After all, we do live in a universe

# STRING THEORY

However, the math works.

Some resist it, because it greatly challenges our current understanding of reality. String Theory predicts there are multiple realities. It takes multiple realities for the math to work.

I'm just going to take  
a second to discuss  
dimensions.

The shape/frequency of strings folds Time-Space.

Now...let's back track to Time-Space being bent by gravity.

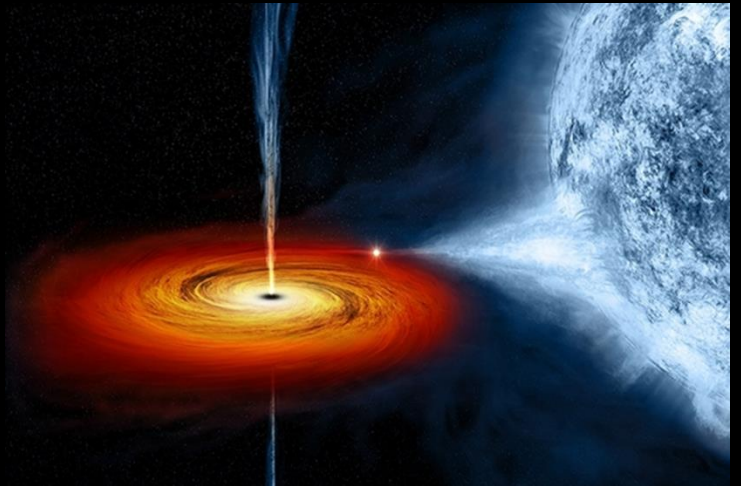

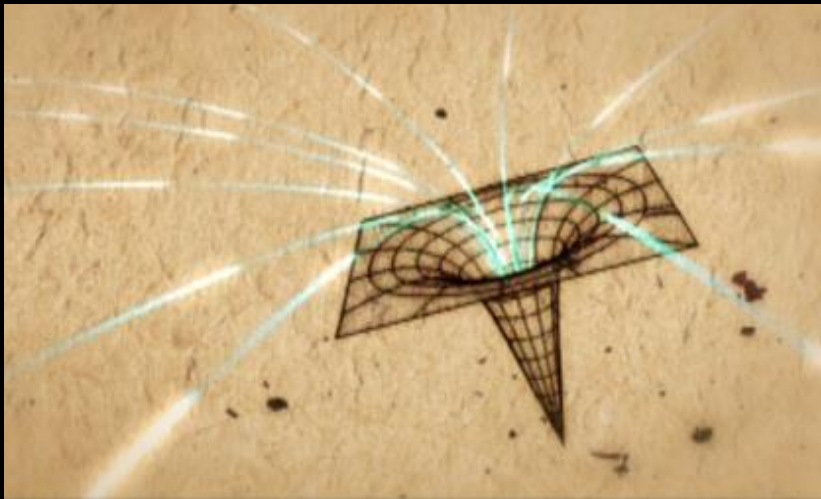

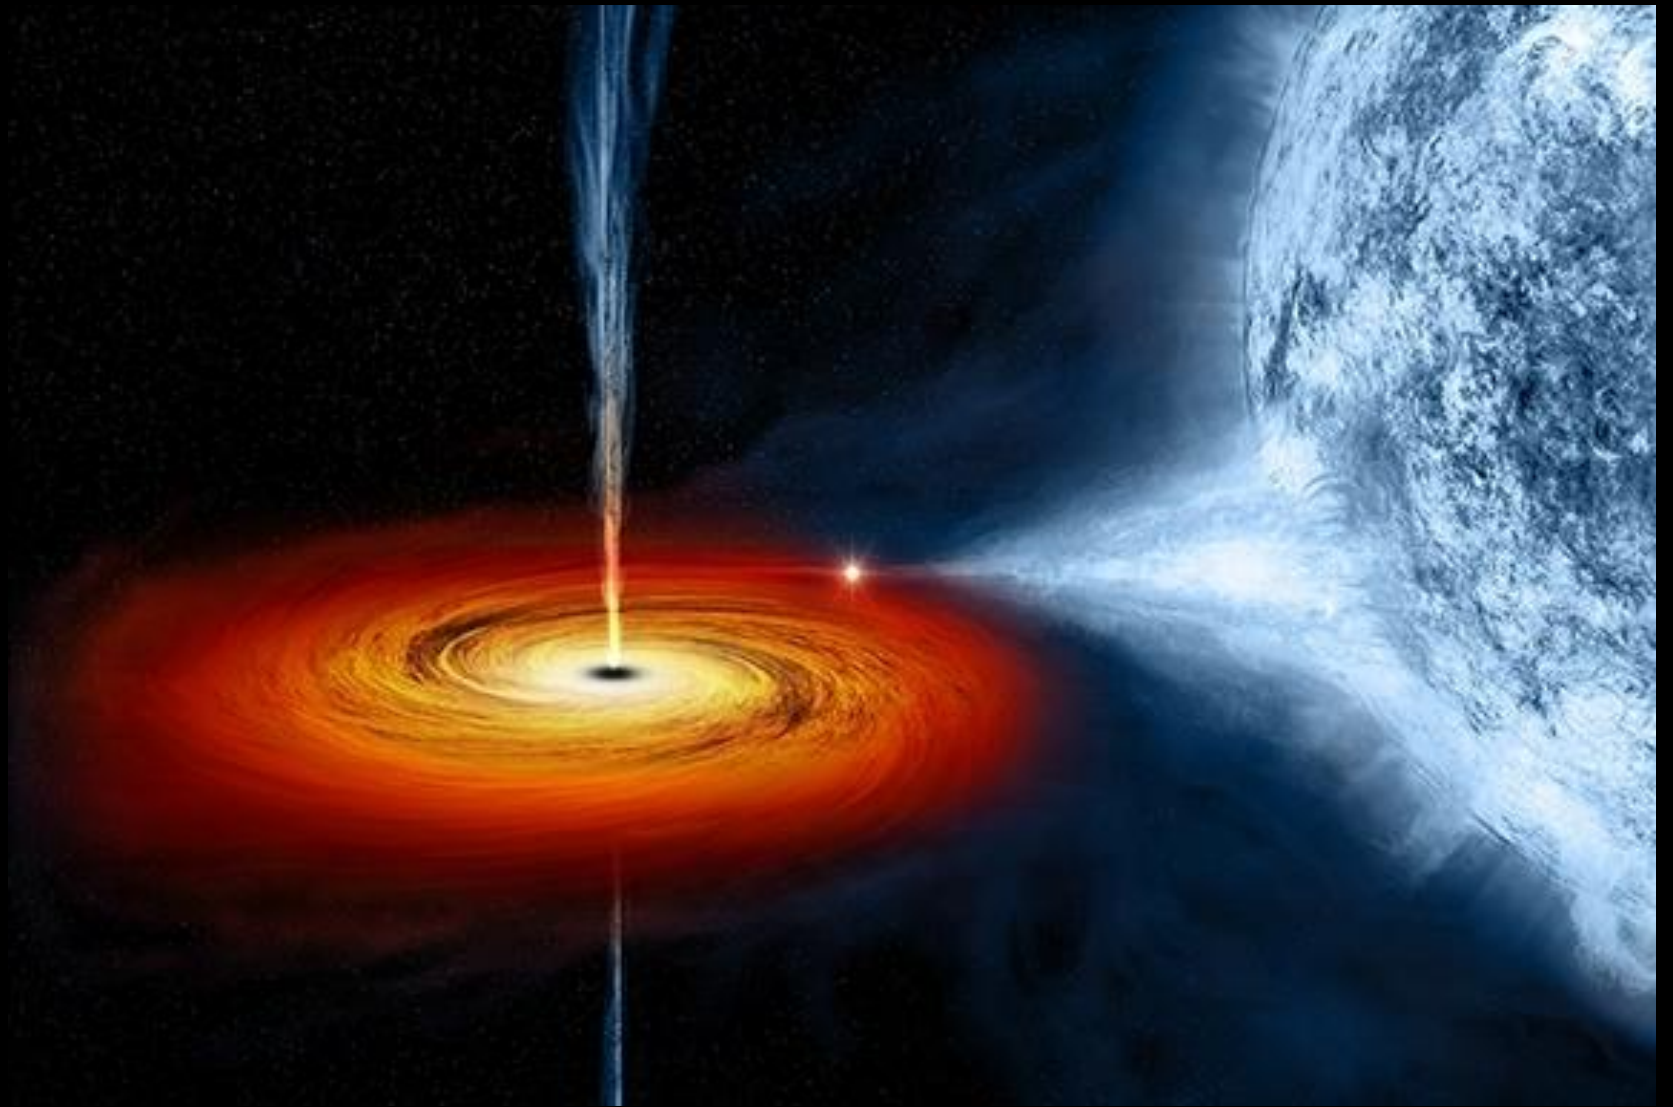

He is best known for providing the first exact solution to the Einstein field equations of general relativity, for the limited case of a single spherical non-rotating mass, which he accomplished in 1915, the same year that Einstein first introduced general relativity. The Schwarzschild solution, which makes use of Schwarzschild coordinates and the Schwarzschild metric, leads to the well-known Schwarzschild radius, which is the size of the event horizon of a non-rotating black hole.

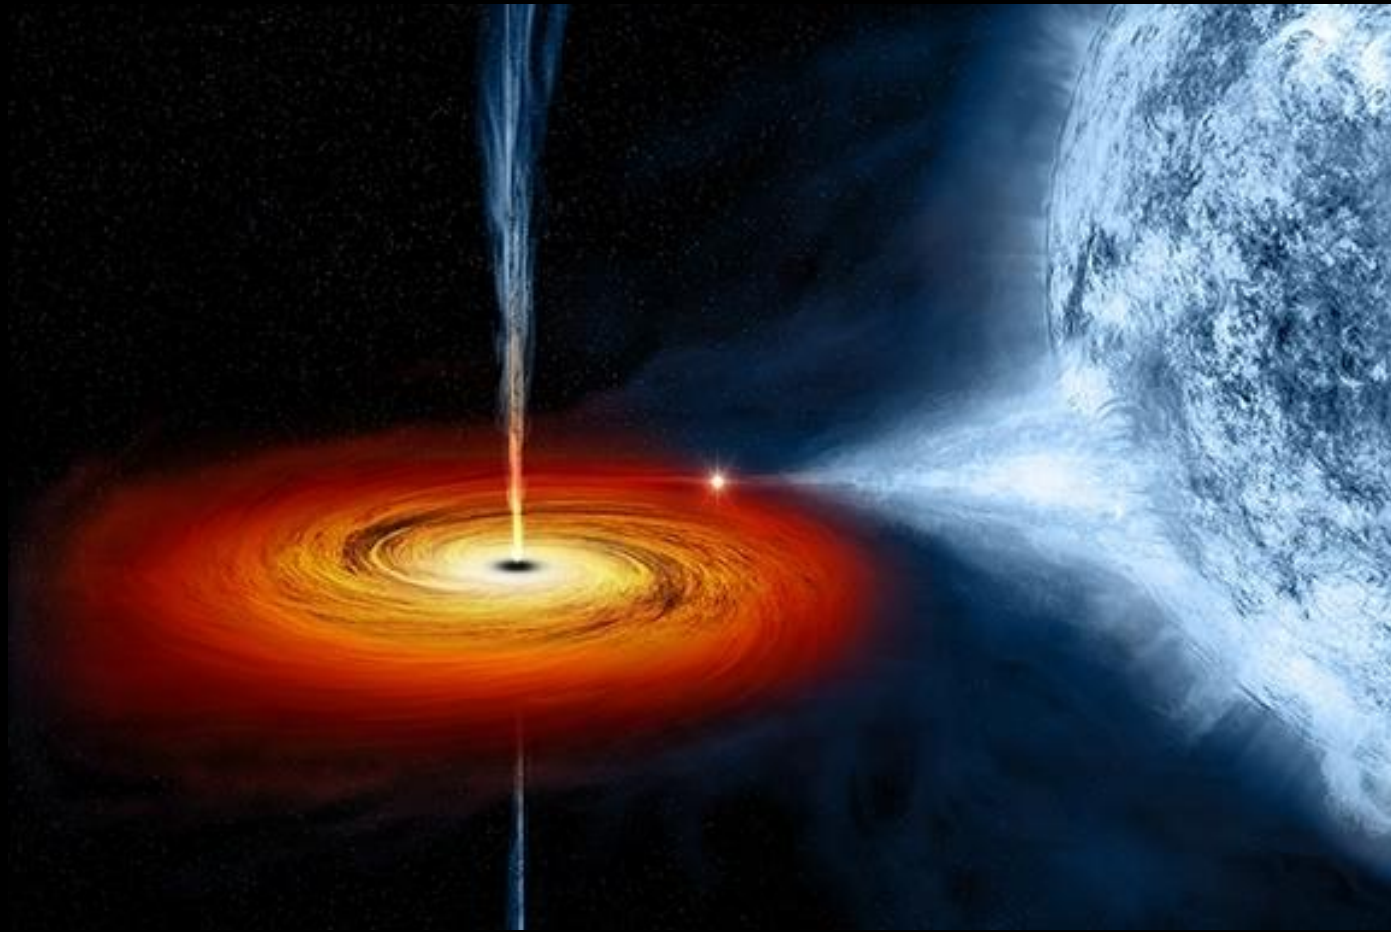

An immense explosion can warp Space-Time!  
This warping is called a Black Hole!!

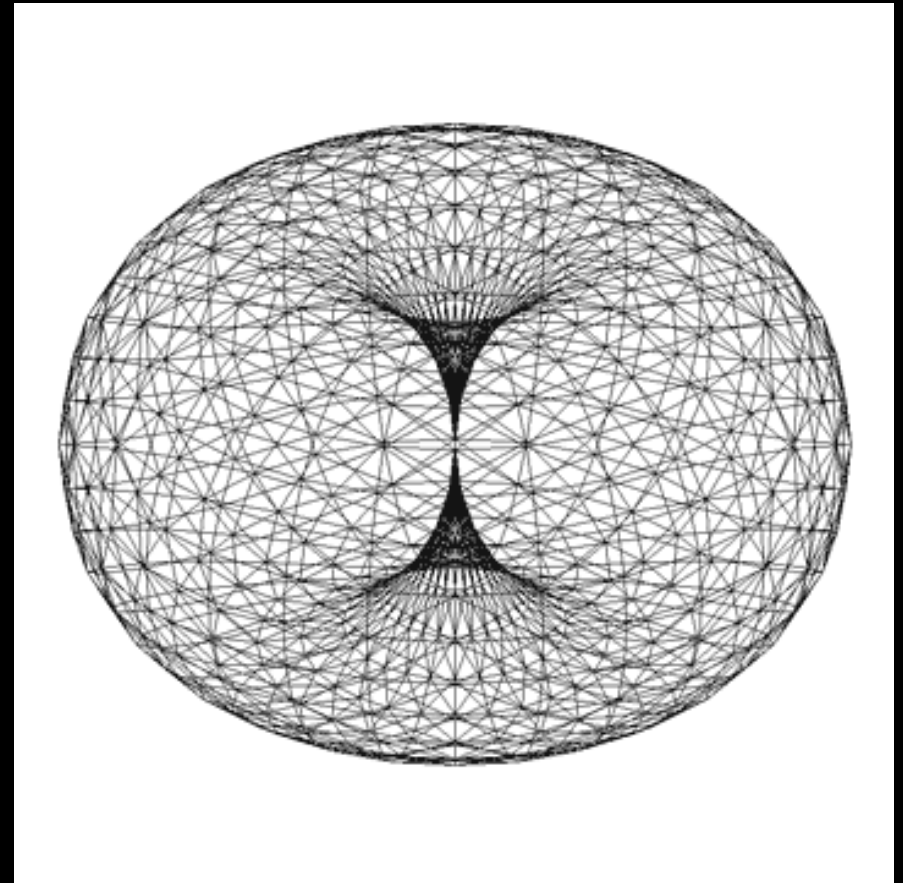

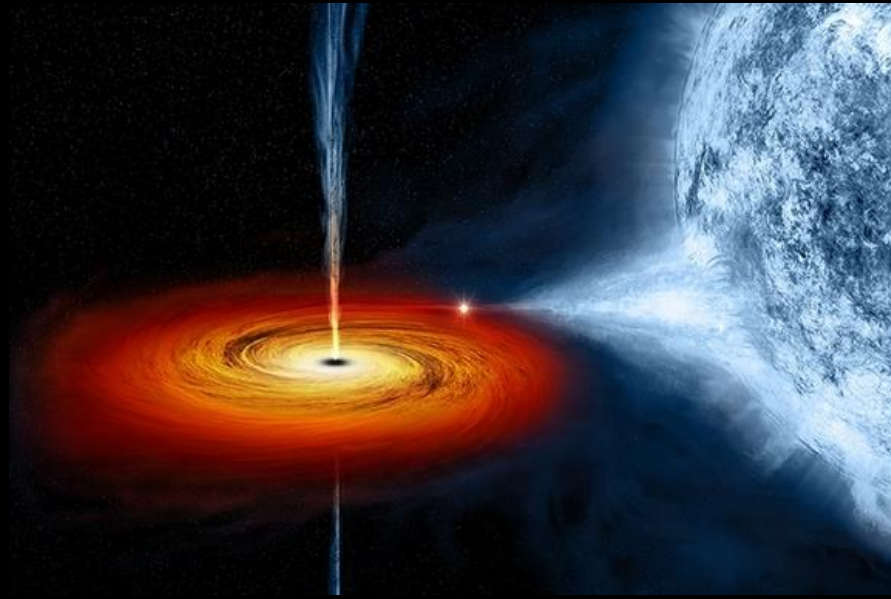

Scientists ask, "What happens in a Black Hole?"

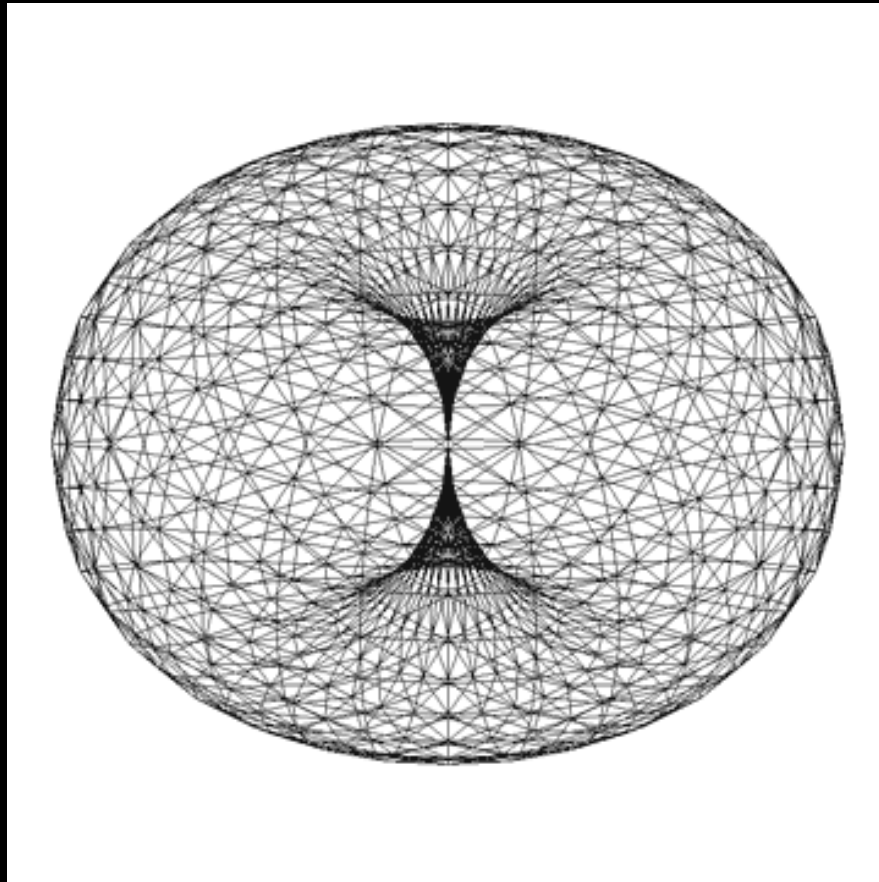

That's kind of a silly question, because we are inside a black hole. There is a black hole at the center of our galaxy.

We are in the toroidal field of our galaxy!!!

BIG BANG = Beginning!

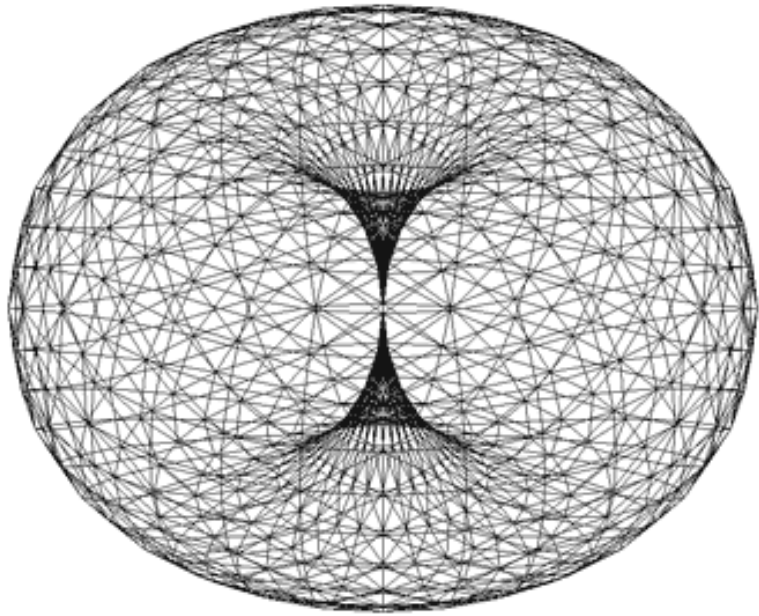

This torodial field that bends time and space  
is around all the planets and stars!

I want to now bring this back hOMe. We ourselves have a toroidal field around us!!!! So created out of and in the image of our Mother and Father. We too bend time and space!!!

So we are already bending Space-Time ourselves.

How do we do it consciously?

How much freedom do we really have?

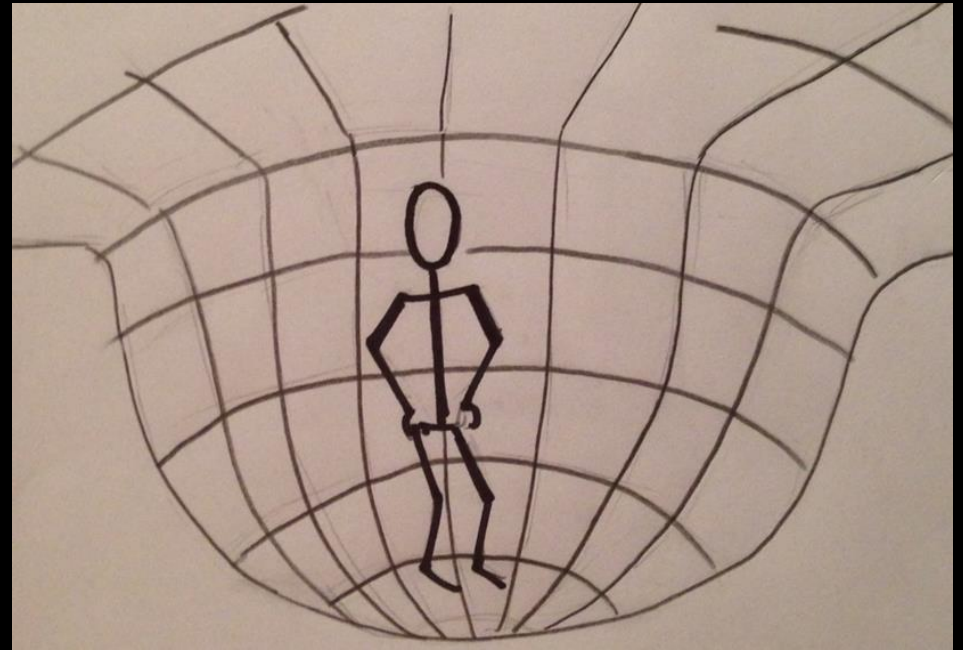

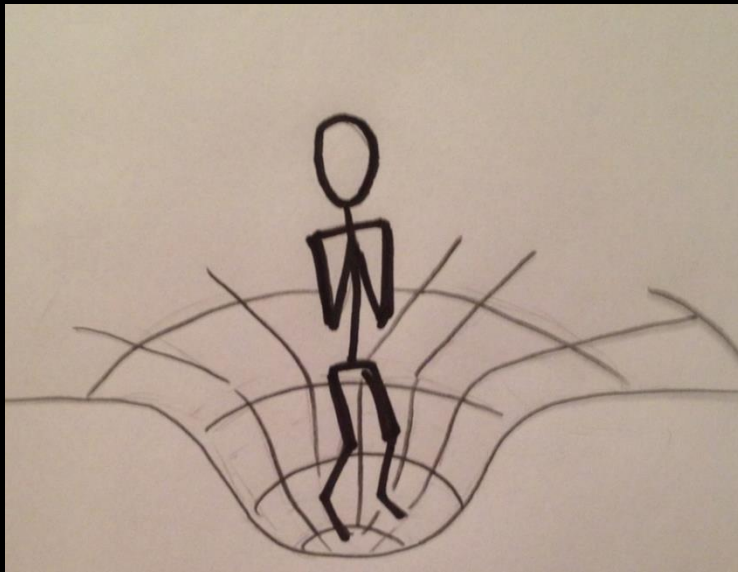

That has been the focus of my recent pondering!

Here is what I have come up with. I am not saying this is truth. You judge for yourself....actually judging may not be something you want to do. I'll explain in a few.

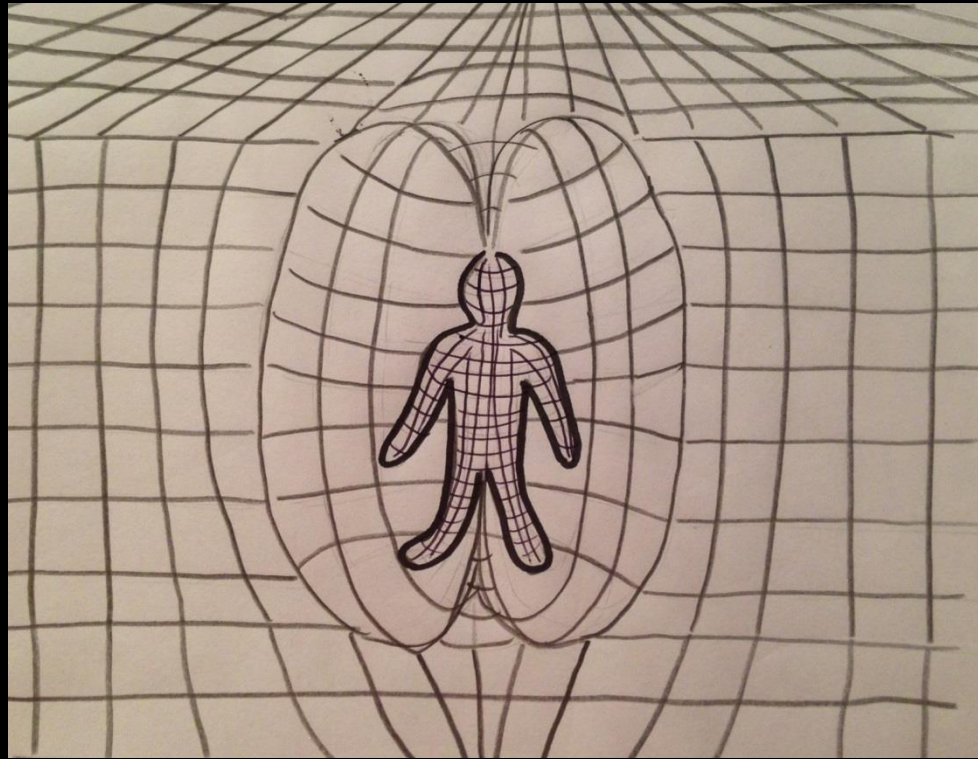

came to me involves Belief VS Knowing.

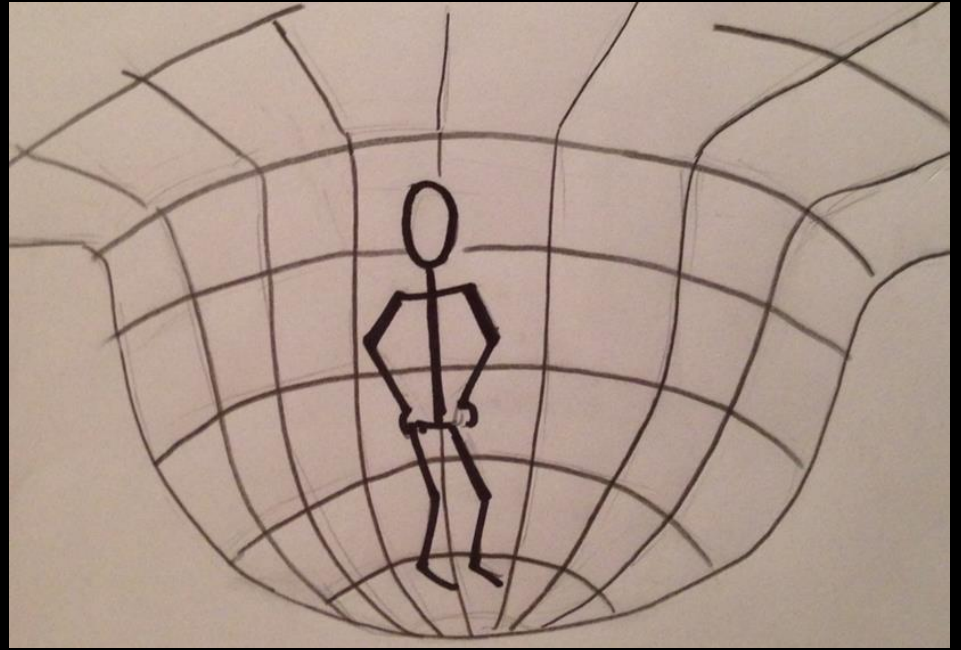

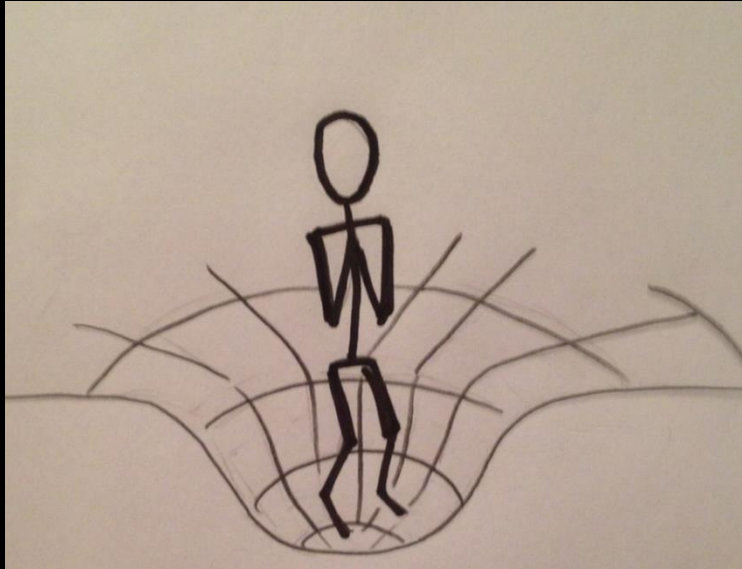

The person coming from believing, praying, asking, etc. has a smaller field. This means they have access to less  
**QUANTUM PROBABILITY!**

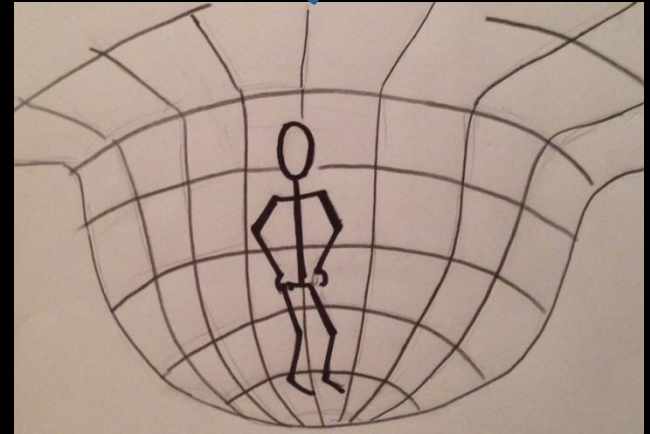

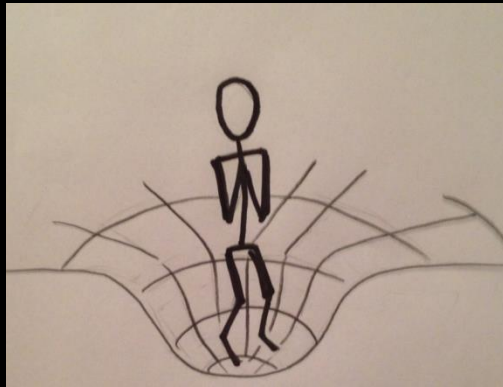

The knowing person has a larger field, and their probabilities increase in to **PREDICATBILITY** to  
**INEVITABILITY!!!**

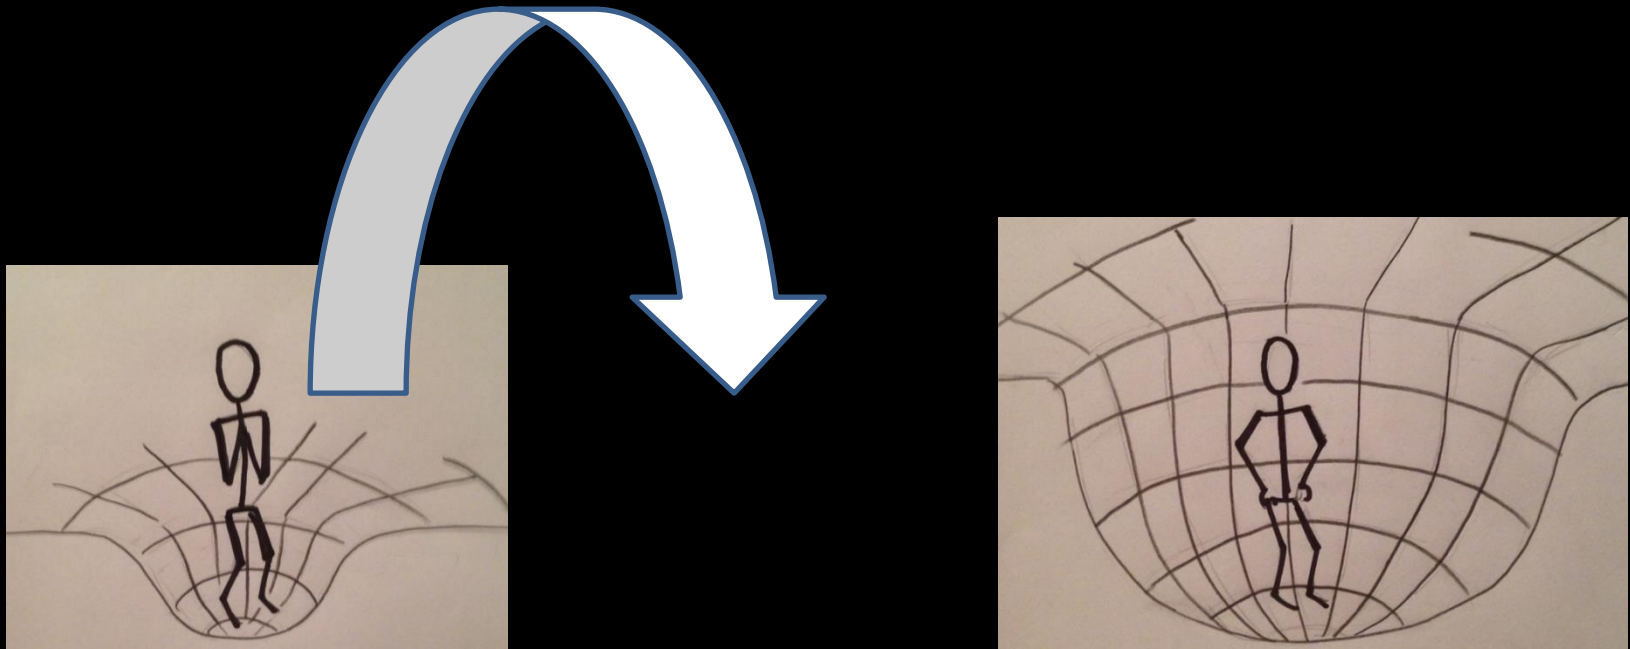

Both people are warping Space-Time. However,  
one has much more **IMPACT** on the field!  
Their thoughts, visuals, words, feelings and  
actions have more **GRAVITY!!!!**

Salt & Pepper

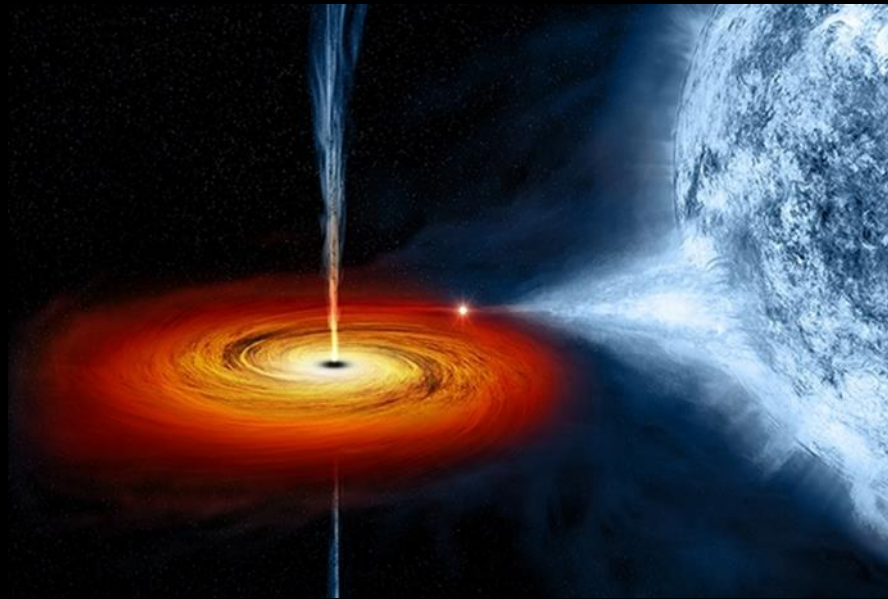

So how do we jump from Believing to Knowing?  
If you are here or are watching this you have already started. The problem is that we tried to make the leap into knowing, and fell somewhere between the two.

The problem is that we tried to make the leap into knowing,  
and fell somewhere between the two.

This all brings us back to the search for the

Have you made the grades?

Have you done the work, or are you trying to  
jump from 9 to 11 (master)?

There are grades in reality, and you have to go  
through them to proceed to the next level.

If you haven't learn to stop judging you will be locked  
into a limited Space-Time!!!

Have you made the grades?

Nonjudgmental

Judgment is everywhere. It controls or  
**TRIES** to control all aspects of life.

What you **DO**, who you have **SEX** with,  
What you **EAT**, What you **THINK**,  
**FEEL**...etc etc. etc.

Have you made the grades?

Once you learn to be nonjudgmental, the less you interfere in anyone else's life.

For you know that everyone is a learning different lessons. You come to a place of allowing others...letting them have their **FREEWILL** and learn how to use it!!!

For example War and Peace....

I honor that place in you  
Where when you are in that place in you  
and I am in that place in me  
WE ARE ONE!

We are made of the same Star stuff, we breathe the same  
Air, walk on the same Earth and drink the same Water.
